

CONFLUENCE

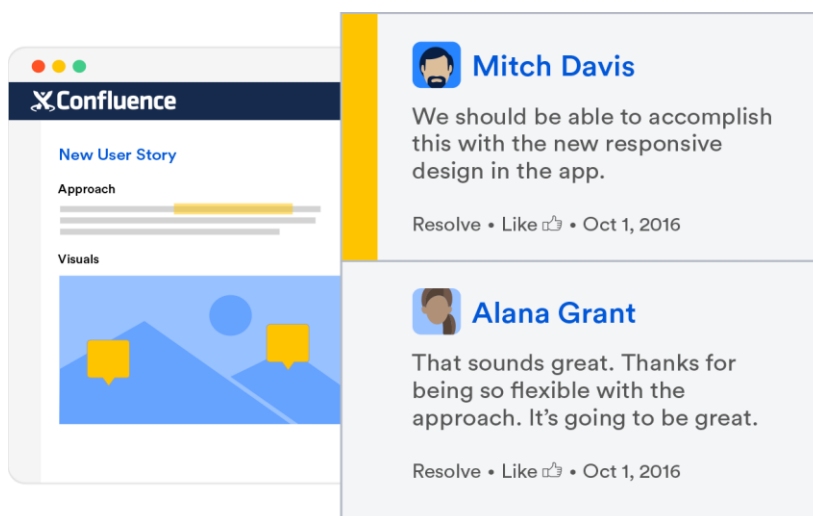

DESCRIPTION

Confluence- Confluence is a content collaboration software that allows teams to create, share and collaborate on project work in one place. It also includes feature such as Team documentation and Knowledge base which allows you to publish and access company information from one platform.

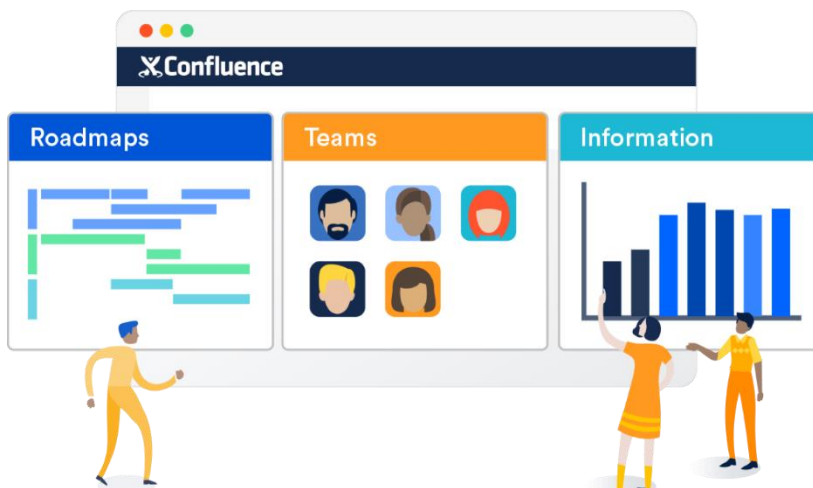

More than just text

Confluence gives you the power to create anything and everything, from meeting notes, project plans, product requirements, and more. Include multimedia, dynamic content, and make your work come to life.

Feedback in context

Leave your feedback on the work itself with inline, page and file commenting on any Confluence page. No more wasted time trying to find feedback trapped in your email or chat thread.

Work in one place

Create a space for every team, department, or major project to share knowledge, information and keep work organized. Use a structured hierarchy and a powerful search engine to find work quickly and easily.
