

FISHEYE

Description

Fisheye- This is a code visualisation tool that enables you to compare code side by side, get a graphical representation of your source code and a visual audit trail of code changes.

```
12 12      },
13 13      ui: {
14 14          content: '.review-activity--content'
15 15      },
16 16      template: headerTemplate,
17 17      onRender: function () {
18 18          initialize: function () {
19 19              this.collectionView = new ReviewActivityItemsCollectionView({
20 20                  el: this.ui.content.get(0),
21 21                  collection: this.collection
22 22              }).render();
23 23          },
24 24          onRender: function () {
25 25              this.collectionView.setElement(this.ui.content.get(0));
26 26              this.collectionView.render();
27 27          },
28 28          triggerOnClose: function () {
29 29              this.trigger('close');
30 30          },
31 31          getContnentElement: function () {
32 32              return this.collectionView.$el;
33 33          }
34 34      }
35 35  }
```

Diff tool

Understand what's changing in your code with side-by-side or unified diff for SVN, Git, Mercurial, CVS and Perforce.
