

CRUCIBLE

DESCRIPTION

Crucible- This is a code review tool that allows you to review code and assign reviewers. Your source code can be commented and turned into a discussion thread as well as files. With this service it is easier to catch major defects and work as a team towards shipping high quality code.

The screenshot shows a code review interface. At the top, there's a list of reviewers: Liang Zheng, Vitalii Petrychuk, and Lukasz Kuzynski. Below this, a code diff is shown with line numbers 59 to 66. The code is in JavaScript, showing a function that processes lines. A comment from Cezary Zawadka is visible, asking about the 'shortest way' to convert strings to numbers in JavaScript. Below the comment, there's a response from Lukasz Kuzynski. The interface also shows a 'Mark as unread' button and a 'Create issue' button.

Code review tool

Catch major defects, improve code architecture, or discuss desired improvements with formal, workflow-based, or quick code reviews.

The screenshot shows a code review interface. At the top, there's a list of reviewers: Piotr Swiecicki, Cezary Zawadka, and Vitalii Petrychuk. Below this, a code diff is shown with line numbers 32 to 36. The code is in Java, showing a method that returns a list of tracked branches. A comment from Piotr Swiecicki is visible, asking about the 'shortest way' to convert strings to numbers in JavaScript. Below the comment, there's a response from Cezary Zawadka. The interface also shows a 'Mark as unread' button and a 'Create issue' button.

Inline discussions

Collaborate right in your code with inline comments, threaded conversations, and mentions.

The screenshot shows a code review interface. At the top, there's a list of reviewers: Adam Borowski, Vitalii Petrychuk, and Vitalii Petrychuk. Below this, a code diff is shown with line numbers 37 to 40. The code is in JavaScript, showing a function that returns a list of tracked branches. A comment from Adam Borowski is visible, asking about the 'shortest way' to convert strings to numbers in JavaScript. Below the comment, there's a response from Vitalii Petrychuk. The interface also shows a 'Mark as unread' button and a 'Create issue' button.

Activity streams

Follow exactly what's happening throughout your projects in real time with activity streams showing recent comments and review updates.
