

Scenario: ADC/AIE Extended (DevOps)

This scenario offers a functional and secure DevOps style environment. The team are situated within an ADC furnished Capgemini, Customer, or other third party office environment. A convenient WiFi network with a high speed internet link provides secure access to the Web and Cloud Services. Secure Remote Access is an option for off-site users or those working from home. There are choices for optional concurrent access to ADC Merlin Hosted Services and VDI/VM farm resources; other ADC Network environments. This scenario is currently provided by the ADC and is employed within SWDC (South Wales Delivery Centre, Treforest) and the ASE/AIE at Holborn.
